Tanya,

We have modified FCR-06 (previously approved on April 27, 2015) to include the use of the alternative well installation method for MW-12. We need to access MW-12 by crossing potential bog turtle habitat. In our discussions with USFWS, they have restricted the use of heavy equipment in these areas. As such, we likely cannot access MW-12 using the geoprobe.

We left the FCR in track changes so you can see the changes that have been made. Only the text was revised; however, I have included the table and figure for completeness.

Please let me know if you have any questions.

Thanks,

Suzy
